

## Gokhale Hall -11/04/17

### Dining Hall

- Dining hall walls are soaking, needs civil work
- Most of the fly catchers are not working
- Dining hall window netting needs replacement, as it is worn out they cannot open the window
- **May be around 3 to 4 times cockroaches have been found from the food. Even while we were present one student came with his plate showing cockroach in it. The kitchen staff should be extra careful while cooking**

### Kitchen

- Cobwebs have to be cleaned periodically
- The cooking burners are in a dire state. The platforms need renovation. The whole thing is falling apart.
- The plastic asbestos sheet of the roof in the vegetable cutting area is in a dire state. Needs replacement and the holes in the roof tops needs to be sealed as during the rainy season the whole area is overflowing with rainy water
- The cooler and aqua guard in the kitchen area both are breaking down periodically, needs to be replaced with the new ones
- **Fly catchers** are needed
- **Chimney** is needed in the kitchen
- **Geyser** is needed in the kitchen for washing used utensils
- **More large cooking utensils** are needed
- **Utensil racks** are needed
- **Dosa Tawa** is needed

### Sanitary and Civil Work

- **Block 'A'** common bathroom is in a soaked and dire state, needs to be renovated.
- **Top floor bathrooms are also in a bad condition as the walls are soaked and the plasters are coming out of the walls. They need complete renovation.**
- **The corridor ceilings are coming down, needs urgent renovation else some accident can happen.**
- **Electrical connection and light frames needs to be changed**
- **Almost 13-15 rooms are in a very terrible state. The walls of the bathrooms are soaked and plasters are coming out of the walls. Needs urgent renovation**
- **The staircase needs civil work**
- Inside every room netting or covering is needed on the drainage pipe
- In the ground floor, most of the rooms, the bathroom door frames are broken and needs replacement
- The **'B'** block ground floor corridor walls have developed holes, which are being used as the nesting place of the small frogs and scorpions. These holes needs to be sealed

The **cycle stand** inside the hall is being used as dump yard. It needs to be cleared up so that during holidays the students can keep their cycles inside the hall
